An oversize tire has certain advantages. So has an oversize battery. Come in and talk it over. Let us show you how "EXIDE" construction makes an oversize battery possible—how it enables you to put more "power, punch and pep" into your starting system. Find out more about "EXIDE" Battery Service—what it means to every owner of an automobile regardless of the make of battery he is using.

**If this is to be your year get a Maxwell**

THERE are untold numbers in America who have felt Old Man Opportunity slap them on the back in the last four months. This is to be their year.

If you be one of them let your mind turn to a larger, more luxurious car—a Maxwell, equipped with every modern device, better looking, better riding.

Give your pride the treat it has looked forward to. Get a self-starting, demountable rim automobile. Get a car that expresses yourself.

A Maxwell costs no more to run or maintain. It gives you many extras in comfort and ease of mind.

Many of the richest men in America drive Maxwells.

They appreciate the 300,000-all-alike idea behind the Maxwell. They know that a chassis which has withstood a manufacturing "run" of 300,000 in 5 years without radical change means a perfection in motor car development.

If your pride could talk it would say:  
**"Get a Maxwell."**

More miles per gallon  
More miles on tires
